

This is a demo file for pandoc-crossref. With this filter, you can cross-reference figures (see figs. 1 to 3), display equations (see eq. (1)) and tables (see tbl. 1)

There is also support for code blocks, for example, lsts. 1 to 3

Chapter 1. Figures

Figure # 1: First figure

Chapter 2. Equations

$$P_i(x) = \sum_i a_i x^i \tag{1}$$

Chapter 3. Tables

Table 1: Table example

First Header	Second Header
Content Cell	Content Cell
Content Cell	Content Cell

Table without caption:

Figure # 2: Second figure

Figure # 3: Third figure

Figure # 4: Unlabelled image

First Header	Second Header
Content Cell	Content Cell
Content Cell	Content Cell

Chapter 4. Code blocks

There are a couple options for code block labels. Those work only if code block id starts with `lst:`, e.g. `{#lst:label}`

caption attribute

`caption` attribute will be treated as code block caption. If code block has both `id` and `caption` attributes, it will be treated as numbered code block.

Listing 1 Listing caption

```
main :: IO ()
main = putStrLn "Hello World!"
```

Table-style captions

Enabled with `codeBlockCaptions` metadata option. If code block is immediately adjacent to paragraph, starting with `Listing:` or `:`, said paragraph will be treated as code block caption.

Listing 2 Listing caption

```
main :: IO ()
main = putStrLn "Hello World!"
```

Wrapping div

Wrapping code block without label in a div with id `lst:...` and class, starting with `listing`, and adding paragraph before code block, but inside div, will treat said paragraph as code block caption.

Listing 3 Listing caption

```
main :: IO ()
main = putStrLn "Hello World!"
```

Chapter 5. Reference lists

It’s also possible to show lists of figures and tables, like this:

List of Figures

1	First figure	1
2	Second figure	2
3	Third figure	2
4	Unlabelled image	3

List of Tables

1	Table example	1
---	-------------------------	---

List of Listings

1	Listing caption	3
2	Listing caption	4
3	Listing caption	4
